EDUCATION

Washington State University Pullman, WA 2020-2025	B.A. Digital Technology and Culture	Minor in Fine Arts. Focus on web development, interaction design, and visual culture.
--	--	---

EXPERIENCE

Nested Remote Jan '26 – Present	Founding Product Designer	Leading 0–1 design for a senior care cost comparison platform serving older adults and adult children navigating high-stakes financial decisions. Designed a progressive intake flow with usability accommodations for cognitive load and emotional sensitivity. Defined visual identity and built a design system from scratch.
Self-Employed Seattle, WA May '25 – Present	Freelance Product Designer & Developer	Operating as full-stack designer-developer for 3 active clients across author, salon, and wholesale furniture verticals. Owning the full pipeline from discovery through visual design, responsive component systems, and production deployment via Claude Code, Next.js, and Vercel.

PROJECTS

Besties Capstone Jan – May '25	Women-Only Friendship App	Designed end-to-end mobile app addressing gaps in adult women’s friendships, grounded in 23 surveys and 16 user interviews. Defined personas, dual-pathway onboarding architecture, and core flows for event discovery, RSVP, and post-event connection. Produced full visual identity and component library.
Cowboy Ted Team of 6, WSU Jan – May '24	Educational Platform Redesign	Redesigned a dual-domain educational platform serving rural families and educators. Identified accessibility and performance gaps via user testing – including a 3.06 contrast ratio failure and 10-second page load times, driving subsequent improvements. Consolidated two domains into a unified IA serving three user tiers.
